# Welcome to Mawarid Al Fayhaa

With 23 long years of experience in the Iraqi industries, Mawarid Al Fayhaa has become a leading service provider giving complete and comprehensive solutions to major oil and gas companies for the past two decades. We participate in reconstruction and development and continually strive to place the country among the list of developed nations in the world. Being one of the leading companies in several major cities of Iraq, we have completed numerous large and complex projects with great success.

# About Us

Mawarid Al Fayhaa was built on a foundation of dedication and a commitment to excellence. From the very beginning, the company has prioritized high standards in quality and service, fostering strong relationships within Iraq's industry.

Today, our team continues this legacy by actively participating in major exhibitions across Iraq, showcasing our expertise, staying connected with industry developments, and expanding our reach. Through these efforts, we remain at the forefront of innovation and quality in our field.

# Our Partners

**MAXIMATOR®**  
maximum pressure

**TRITORC**

**schwer**  
fittings

# Mission

Mawarid Al Fayhaa aims to become a forerunner in the industry to supply and support companies and helping them execute projects efficiently, thus also promoting the development of the country. We thrive on continuous improvement and innovation, elaborate planning, professional integrity, highest quality machinery and equipment, and best HSE standards coupled with a “can-do” approach which make up the core fundamentals of Al Fayhaa Group functionality.

# Vision

Mawarid Al Fayhaa seeks to maintain and grow its reputation for providing excellent cost-effective and innovative pipeline solutions, technical excellence in project execution, and a final installation which is accepted as high quality by our reputed clients.

# Our Facilities

## **Baghdad - Main Office**

M.293, Z.24,  
Al Jaderiah, Karradah

## **Basra - Branch**

Pearl Building, Office 203/204  
Abbasiya, Basra

## **Baghdad - Warehouse**

## **Iraq Industrial City - Service Center**

We intend to acquire a facility in another free zone industrial city focused on oil and gas. This city is projected to be one of the biggest industrial areas in the middle east.

# **OIL & GAS EQUIPMENT SUPPLY AND SERVICES**

Al Fayhaa Group provides comprehensive pipeline solutions tailored to meet the unique needs of its clients, ensuring efficiency, durability, and compliance with industry standards.

## Hydraulic Torque wrench – TSL - Square drive

Controlled Bolting tools

The TSL Series Hydraulic Torque Wrench provides powerful, precise torque for high-performance applications. Featuring a square drive hydraulic torque wrench, ideal for bolting in industrial sectors, including oil, gas, and power plants. With advanced torque control, it ensures accuracy and safety during assembly and maintenance tasks.

### Key Features

- Max Torque: Up to 70,000 Nm
- Square drive for versatile applications
- Compact and lightweight design
- Reliable for heavy-duty use

## Hydraulic Torque wrench - THL - Hex drive

Controlled Bolting tools

The THL Series Hydraulic Torque Wrench is designed with a hex drive, offers high torque output and versatility. THL torque wrench is essential for tight spaces and provides precise, repeatable torque for torquing and de-torquing applications. Ideal for industries requiring high torque with accuracy.

### Key Features

- Max Torque: Up to 53512 Nm
- Hex drive for secure bolt engagement
- Lightweight and durable
- Simple to operate in confined spaces

## Hydraulic Torque wrench THL Ultra slim - Hex drive

Controlled Bolting tools

The THL Ultra Slim Series is designed for applications where space is limited, delivering powerful torque in compact, hard-to-reach areas. Built with a slim profile, for maximum performance without compromising on accuracy or reliability. Perfect for industries with confined spaces, such as offshore and refinery applications.

### Key Features

- Max Torque: Up to 5925 Nm
- Ultra-slim design for confined spaces
- High precision with easy access to bolts
- Robust and long-lasting

## Hydraulic Bolt tensioner - BTL Series

Controlled Bolting tools

The BTL Series Hydraulic Bolt Tensioner is built for safe and efficient bolt tensioning in offshore, onshore, and plant maintenance environments. It is designed to work in top-side access situations, providing reliable and repeatable tensioning to prevent bolt failure.

### Key Features

- Max Tension: 5406 kN
- Ideal for offshore and refinery applications
- Easy to operate and portable
- Enhanced safety features for reliable operation

## Hydraulic Bolt tensioner - SLT Series

Controlled Bolting tools

The SLT Series Hydraulic Bolt Tensioner offers a spring-return mechanism that simplifies tensioning tasks for multiple bolts. Its durable construction and easy-to-use design make it an excellent choice for repetitive applications in harsh environments like oil & gas fields and heavy industrial settings

### Key Features

- Max Tension: 3200 kN
- Spring-return mechanism for efficient operation
- High reliability in challenging conditions
- Designed for large-scale maintenance tasks

## Hydraulic Bolt tensioner - MST Series

Controlled Bolting tools

The MST Series Multi-Stage Hydraulic Bolt Tensioner is engineered to handle high-tension applications with large-diameter bolts. Offering multiple stages of tensioning, it ensures uniform load distribution for better performance and safety, especially in critical applications like heat exchangers and pressure vessels.

### Key Features

- Max Tension: 1231 kN
- Multi-stage tensioning for uniform load distribution
- Ideal for large-diameter bolts
- Optimized for high-pressure systems

## Pipe cutting and Beveling machine - TSF series split frame

On site machining tools

The TSF Series Machine excels in pipe cutting, beveling, and end preparation is used for maintenance applications. With innovative Split Frame design, it can be easily split and mounted around the outer diameter of pipes or fittings. This provides a stable and secure operation. It also provides spark-free cutting, which make it easier to work in dangerous industries.

### Technical Data

Air Requirement: 100 CFM @ 0.7/0.8Mpa | Hydraulic Requirement: 2-60L/min @ 12.5Mpa | Power Supply: 380-440V, 3Phase, 50/60Hz | Drive Options: Pneumatic, Hydraulic, Electric

### Key Features

- Split frame technology for easy assembly and dis-assembly
- Low Axial and Radial Clearance
- Auto-feed mechanism for cutting and beveling
- Multiple motor positioning options

## Tube Tools

Installation, Removal & Cleaning

TRITORC specialized in high producing re-tubing tools packages, technical assistance, planning, specification, procedures, contractor support and turnkey services to the level and circumstances necessary for particular project. We provides complete On-site / workshop support for Exchanger re-tubing.

We offer Replacement of Tubes in Heat Exchanger, Coolers and Surface Condensers. We offer this service for both "U" Tube and Straight Tube equipment. We have highly qualified, skilled and experienced Engineers and Technicians to carry out Removal of Old tubes, Surface Preparation of Tube Sheets, Insertion of New Tubes, tube to tube sheet expansion, Tube to Tube Sheet welding as per the customer's requirement.

# On-Site Services

**Hot-Tapping**

**Retubing Services**

**On-line Leak  
Sealing**

**Hydro Jetting**

## Surface Preparation and Maintenance

MontiPWA specializes in delivering innovative and sustainable surface preparation solutions, offering efficient methods for rust removal, coating elimination, and contaminant cleaning to enhance the durability and performance of industrial assets. Sa2.5 grade surface preparation.

## Surface Coating

Allter is an alternative coating brand offering unique solutions for under- and above-ground steel assets, setting a new standard for future oriented thinking in the coating industry regarding product safety during manufacturing, application, and service.

## Surface Repair

Advanced composite repair technologies to restore and reinforce critical industrial assets, particularly pipelines and structures in the Oil & Gas sector

## Air Driven Liquid Pumps

- Easy to maintain, ex-proof
- Low energy consumption
- Operating pressures up to max. 5,500 bar

## Air Driven Air Amplifiers

- For increasing air pressure
- Specific air pressure amplification to suit your requirements
- Connection to electrical supply not necessary
- Operating pressure max. 40 bar

## Air Driven Gas Boosters

- For pressurizing gases (nitrogen, oxygen, inert gases)
- Simple handling
- Intrinsically safe and explosion proof i. e. not electromotive, but pneumatically powered
- Operating pressure max. 1,000 bar

## Valves, Fittings and Tubes

- Stainless steel design
- Temperatures from -250° C to +650° C for liquids and gases
- Maximum outlet pressures up to 10,500 bar

# Instrumentation and Control

Al Fayhaa Group is a trusted supplier of high-quality valves and fittings from leading European manufacturers such as Maximator, and Schwer fittings. With a comprehensive range of solutions, we cater to various industries requiring precision-engineered components for fluid and gas control. Our offerings include low to high-pressure outlets, capable of handling pressures up to 10,500 bar, ensuring reliability and performance in the most demanding applications. Committed to excellence, we provide our clients with world-class products that meet the highest safety and efficiency standards, reinforcing our position as a key supplier in Iraq and the region.

# **HEAVY MACHINERY SALES & LEASING**

# MB Crusher Products

MB Crusher is a globally recognized manufacturer of innovative crushing and screening equipment, specializing in attachments for excavators, loaders, and skid steers. Their advanced solutions enable on-site material processing, reducing costs and environmental impact. Al Fayhaa Group is the sole partner of MB Crusher in Iraq, providing local industries with cutting-edge machinery for efficient material handling and recycling. Through this partnership, Al Fayhaa Group ensures customers in Iraq have access to MB Crusher's high-performance equipment, backed by expert support and service.

Headquarters: Fara Vicentino, Italy

# Health, Safety, and Environment Standards

At Al Fayhaa Group, health, safety, and environmental protection are fundamental values that guide every aspect of our operations. We prioritize creating a safe and healthy work environment, strictly adhering to HSE standards and regularly updating our protocols to align with international best practices. Our team undergoes comprehensive HSE training, ensuring they are equipped with the knowledge and skills to prevent accidents and mitigate risks.

Additionally, we focus on environmental safety, employing procedures that minimize our environmental impact, including proper waste disposal, pollution control, and resource conservation. Our commitment to HSE not only ensures regulatory compliance but reflects our dedication to the well-being of our employees, the community, and the natural environment of Iraq.

# Environmental Initiatives and Sustainability

At Al Fayhaa Group, we are deeply committed to promoting environmental sustainability and minimizing our ecological footprint in Iraq. As part of our green initiatives, we have implemented waste reduction practices across our operations, ensuring efficient use of resources and minimal waste generation. We invest in energy-efficient technologies, aiming to reduce our carbon emissions and support Iraq's environmental goals. Additionally, our commitment extends to sustainable sourcing, collaborating with partners who adhere to ethical and eco-friendly practices. Al Fayhaa Group is dedicated to continually enhancing our environmental practices, from adopting renewable energy sources to actively participating in community-led environmental programs that benefit the local ecosystem.

# Quality Assurance & Quality Control

Quality assurance (QA) and Quality control (QC) are integral components of our commitment to delivering excellence in every project. Our QA processes are designed to ensure that all operational procedures align with international standards, fostering a culture of continuous improvement. Through rigorous QC practices, we meticulously inspect and test every product and service to guarantee reliability, safety, and adherence to client specifications. By leveraging advanced technologies and a highly skilled workforce, Al Fayhaa Group upholds its reputation for quality, ensuring that our solutions not only meet but exceed the expectations of our valued partners.

## CERTIFICATE OF REGISTRATION

Awarded to

**MAWARID AL FAYHAA GENERAL  
TRADING LTD. CO.**

**Z.24, M.923, Al Jaderia, Baghdad - Iraq.**

QAI Certification Services LLC certifies that Occupational Health & Safety Management System of the above Organization has been audited and found to be in accordance with the requirements of the Management System Standard detailed below:

**ISO 45001: 2018**

Approved scope to which this certificate refers:

SUPPLIER OF OIL & GAS AND CONSTRUCTION EQUIPMENT, PIPELINE SOLUTIONS SERVICE PROVIDER OF BOLTING AND ON-SITE MACHINING TOOLS, TUBE TOOLS AND HOT-TAPPING SERVICES, HIGH PRESSURE PUMPS, GAS BOOSTERS AND VALVES AND FITTINGS, LEAK DETECTION AND PREVENTION PROCEDURES, HIGH PRESSURE HYDRAULIC EQUIPMENT SUPPLY, BELT CONVEYORS, SUPPLY OF CRUSHER BUCKETS, SCREENING BUCKETS, SHAFTS SCREENERS, DRUM CUTTERS, SORTING GRAPPLES

Certification Issue Date: 12<sup>th</sup> November 2024 Certificate Renewal Before: 12<sup>th</sup> November 2025

Date of Initial Registration: 12<sup>th</sup> November 2024 Recertification Before: 12<sup>th</sup> November 2027

2027 Certification No: QAICME231081037

Signed for and on behalf of the Board.
